Projects

BanterBox – Real-Time Chat Application *(In Progress)*
React, Ruby on Rails, ActionCable, JWT, Tailwind CSS
- Designed and built a modular, responsive chat interface with secure image uploads
- Integrated real-time messaging with WebSockets and user status indicators
- Deployed frontend with Netlify and backend API with Render

Portfolio Website – Personal Developer Showcase
React, Vite, Tailwind CSS, Ruby on Rails API
- Built a responsive, accessible portfolio site to present projects and skills to prospective employers
- Integrated Rails API to dynamically serve project information
- Applied modern design principles, animations, and interactive UI features

WeatherNow – Live Weather Dashboard
JavaScript, HTML/CSS, OpenWeather API
- Developed a location-based weather app providing real-time API data
- Planned user experience flow and implemented graceful error handling
- Designed responsive layout using CSS Flexbox with accessibility considerations
